

GEOLOGICAL MAP OF THE VESTER-GJERSVIKSETEREN SHEET

(DP 159-5-1) RØYRVIK N.TRØNDELAG

LEGEND

Meta-intrusive rocks

- 1 Coarse-grained trondhjemite
- 2 Marginal phase of the coarse-grained trondhjemite
- 3 Fine-grained porphyritic trondhjemite
- 4 Gabbro
- 5 Gabbro inclusions within the coarse-grained trondhjemite

Meta-extrusive rocks

- 5 Metafelsic complex or quartz keratophyre
- Metafelsic tuff
- Breccia-bearing felsic complex
- Stilpnomaline-bearing felsic complex
- 6 Dark greenstone
- Dark epidote-rich greenstone
- Dark stilpnomaline- and biotite-bearing greenstone
- Pillowed, epidote-rich greenstone

Mineralization

- ♀ Outcrop of the massive sulphides
- Intense sulphide mineralization
- ♂ Outcrop of the chert
- Quartz vein

Structural symbols

- Faults and uncertain faults
- Clavage
- Syncline
- Belt of the strong foliation or schistosity

Lithological boundaries

- Lithological boundary
- Uncertain lithological boundary

Others

- #4 Position and number of the drilling holes
- Road
- Lake

SCALE 1:5000
