

As West Winze has already penetrated over 200 meters towards N.E., a 400 on that side is necessary, i.e., 100 meters farther back than shown here.

Udmaal of Kjöli No 1: 207 meters SW, and 80 meters N.E. of Udmaal Point. Udmaal of Kjöli 2: 282 meters from Eastern Udmaal limit of Kjöli 1, i.e., 282 + 80 meters from Kjöli Udmaal point.
These above Udmaals convey continuous rights to 362 meters of strike.

Necessity for Muthings Rights at Kjöli Mine. Ore faulted at A, Adit B a necessity to drain mine, therefore rights to mineral in Adit & winze must precede exploration.

Muthing Necessary: 1000 meters on Strike & 400+300 for side limits.

Western Udmaal boundary of Kjöli 1, also boundary mark denoting division between Kjöli 1 & Kjöli 2 only accessible in late Summer, and are not mapped

- Strike of lode, (non mineralised,) ———— o
- Lode outcrop ———— x
- Raises from Adit proving Strike ———— ■

Joh. 1-6 1917
